

APPENDIX A

Version with markings to show changes made

Claims

2. (Amended) [The] A console lid mounted screen comprising: [of claim 1,]

a console lid positioned over a console for pivotal movement relative thereto, said console lid having an interior compartment and a bottom side, said console having a storage bin; and

a display screen mounted in a movable frame pivotally positioned within said interior compartment of said lid, wherein said movable frame [lid] can pivot between at least an open position and a closed position relative to said lid, wherein when said movable frame is in said closed position, said screen is inaccessible.

3. (Amended) The console lid mounted screen of claim 2, wherein said lid can pivot between an open position and a closed position, wherein when said lid is in said open position, [the] said storage bin of said console is accessible.

4. (Amended) The console lid mounted screen of claim 3, wherein [the] said bottom side of said interior compartment is comprised of a substantially rigid material.

5. (Amended) The console lid mounted screen of claim 4, wherein [one of said positions of said frame is the closed position and] when said frame is in said closed position, said screen is hidden from view and said lid has a substantially flat profile.

APPENDIX A

7. (Amended) A console lid mounted screen comprising:

a frame pivotally attached to a console lid with at least one friction pinion;

a display screen defined within said frame; and

said console lid having a compartment defined therein to receive said frame, said compartment having a [; and the] bottom side [of said compartment] having a substantially rigid surface.
